FOCUS™

Windshield Wiper Program

The Bosch FOCUS™ windshield wiper provides optimal night clarity and enhances safer driving.

- 1 NightView™ technology** creates a single core construction that fuses the blade to base connector and provides uniform wiping stability resulting in reduced blur for optimal night clarity.
- 2 NightSpoiler** combines a water repelling polymer coating and light absorbing charcoal powder that reduces glare from reflective lights and repels water droplets to increase visibility.
- 3 ClearMax 365™** is an exclusive patented dual synthetic rubber technology providing optimal visibility in all weather conditions and up to 40% longer performance than other premium blades.
- 4** When the **SafeCheck indicator** turns yellow it's time to check your blades for safer driving rain, sleet or snow.
